

Development of the agency work sector during the Covid-19 pandemic

The agency work sector has taken significant and unprecedented hits due to the Covid-19 pandemic and consequent containment measures (e.g. government-ordered workplace closures). In many countries, activity dropped below levels during the 2009 recession.

In the *United Kingdom*, billings for agency workers declined at the sharpest rates recorded since the inception of the REC’s Temp Billing Index 22 years ago. This Index is down by 79% in April 2020 compared to February 2020 (Source: [REC Report on Jobs](#)).

Meanwhile, WEC national federation members have gained further insight through surveys among their members:

- In *Austria*, 92% of agencies have reported a drop in the number of workers at the end of March compared to the period right before the lockdown (Source: *Österreichs Personaldienstleister*)
- In *Denmark*, 30% of companies report revenue declines of at least 50% since the lockdown was implemented (Source: *Dansk Erhverv*)
- In *Norway*, 43% of companies report revenue declines of at least 41% in March (Source: *NHOSH*)
- In *Sweden*, 46% of companies report revenue declines of at least 50% in March compared to the same period of the previous year (Source: *Kompetensföretagen*)

Global Financial Crisis vs. Covid-19 Crisis

In comparison to the Global Financial Crisis, the 2020 crisis resulted in steeper drops in agency work activity and GDP in Europe and the US (Figure 6 & 7). The second quarter of 2020 is currently the lowest point in the downturn. At the same time, latest monthly figures indicate towards a quicker recovery, as indicators for agency work are falling at continuously slower rates over the course of the second quarter (Figures 1 & 2).
